

Cas 1447824-23-8 Cosmetic Peptide Palmitoyl Tripeptide-38 For Anti Wrinkle

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Palmitoyl tripeptide-38
- Minimum Order Quantity: 1 kg
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T, MoneyGram
- Supply Ability: 20000 boxes/Month

Product Specification

- Product Name: Palmitoyl Tripeptide-38
- CAS No.: 1447824-23-8
- Physical Appearance: White Powder
- Specification: 99% Purity
- Shelf Life: 2 Years
- Storage Condition: Cool Dry Place
- Molecular Formula: C33H65N5O7S
- Usage: Anti-Aging, Anti Wrinkle
- Highlight: **Cosmetic Peptide CAS 1447824-23-8, Cosmetic Peptide Palmitoyl Tripeptide-38, Anti Wrinkle Palmitoyl Tripeptide-38**

Product Description

Introduction of Cas 1447824-23-8 Cosmetic Peptide Palmitoyl Tripeptide-38 For Anti Wrinkle

Palmitoyl tripeptide, also known as MATRIXYL synthe'6 and Volulip, is a cosmetic peptide or double oxidised lipopeptide consisting of three amino acids and is the product of the reaction between palmitic acid and tripeptide-38. It is white or light white in colour and its molecular structural formula is shown in Figure 1. This peptide is a pro-collagen lipopeptide that rebuilds the skin from within where it needs to be, soothing wrinkles and skin, especially on the forehead, crow's feet, head and neck. Palmitoyl tripeptide-38 is now a popular anti-wrinkle and anti-ageing cosmetic material in our lives and has been developed for the different aspects involved in skin aging.

Anti-wrinkle and anti-aging mechanism

Palmitoyl tripeptide-38 has similar effects to Matrikine, an amino acid chain that has demonstrated the ability to increase the production of dermal and epidermal components such as collagen (including types I, III and IV), fibronectin, hyaluronic acid (ability to retain water) and laminin 5 (role in building epithelial basement membranes, cell adhesion, growth and differentiation). As a result, palmitoyl tripeptide-38 promotes skin regeneration, smoothes wrinkles and skin, and delays the appearance of signs of aging. In addition, it deeply replenishes nutrients, lightens lip lines and increases elasticity.

Efficacy of Cas 1447824-23-8 Cosmetic Peptide Palmitoyl Tripeptide-38 For Anti Wrinkle

Palmitoyl Tripeptide-38 plays an important role in our lives as a cosmetic ingredient. It has many positive effects, for example, it can be used as a serum-related ingredient in cosmetic formulations to reduce the appearance of fine lines and wrinkles, especially on the forehead, crow's feet, head and neck. The anti-wrinkle effect of palmitoyl tripeptide-38 has also been clinically proven. In vitro studies have shown that palmitoyl tripeptide-38 can be added as an ingredient to serum formulations to exert a variety of synergistic beneficial anti-ageing effects in the epidermis and dermis and, most importantly, to reduce wrinkles, redden the dermis and achieve a skin smoothing effect. Due to its specific properties and positive effects, it may attract more attention from researchers and is expected to be used in cosmetic applications such as skin care products, anti-wrinkle and anti-aging products and skin repair products.

Basic Information of Palmitoyl tripeptide-38

Product Name	Palmitoyl tripeptide-38
Purity	99.0%
MF	C33H65N5O7S
Storage	Cool Dry Place
MOQ	1kg
