

1-500g Cas 935288-50-9 Acetyl Decapeptide-3 White Powder For Anti Wrinkle

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: HPLC
- Model Number: HBY-Acetyl Decapeptide-3
- Minimum Order Quantity: 1-500g
- Price: Negotiable
- Packaging Details: 1-500g /plastic bottle
- Delivery Time: 3~5 days, upon receipt of payment
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 5000g per month

Acetyl Decapeptide-3

Product Specification

- INCI Name: Acetyl Decapeptide-3 Powder
- Cas No.: 935288-50-9
- Water(K.F.): $\leq 7.0\%$
- Recommended Use Level: 100-1000PPM
- Store At: Keep In Dark And Cool Dry Place (-5 To 8°C)
- Appearance: White To Off-white Powder
- Odor: Slightly Characteristic Odor
- Theoretical MW: 1450.63
- Purity (HPLC): $\geq 95.0\%$
- Acetic Acid Content: $\leq 15.0\%$
- Applications: Anti-wrinkle
- Functions: Accelerate The Formation Of New Skin Cells, Reducing And Preventing Fine Lines, Wrinkles And Scars. It Also Can Strengthen Skin Elasticity By Inducing The Synthesis Of Collagen And Elastin.

Product Description

1-500g Cas 935288-50-9 Acetyl Decapeptide-3 White Powder For Anti-Wrinkle

Basic Information of Acetyl Decapeptide-3 (Rejuline):

Product Name	Acetyl Decapeptide-3 (Rejuline) powder
CAS Number	935288-50-9
Appearance	White to off-white powder
Applications	Anti-wrinkle
Purity (HPLC)	≥95.0%
Recommended use level	100-1000PPM

Description of Acetyl Decapeptide-3 (Rejuline)

Acetyl Decapeptide-3 (Rejuline) is a synthetic peptide that is used in cosmetics as an anti-aging and anti-wrinkle ingredient. It is a chain of ten amino acids that is designed to mimic the structure of a naturally occurring protein that is involved in skin repair and regeneration.

Acetyl Decapeptide-3 works by stimulating the production of collagen and elastin, two proteins that are essential for maintaining skin elasticity and firmness. It also helps to protect the skin from damage caused by free radicals.

In clinical studies, Acetyl Decapeptide-3 has been shown to be effective in reducing the appearance of wrinkles, improving skin tone and texture, and increasing overall skin hydration. It is generally safe and well-tolerated, even for sensitive skin.

How does it work?

Acetyl Decapeptide-3 (Rejuline) works by stimulating the production of collagen and elastin, two proteins that are essential for maintaining skin elasticity and firmness. It also helps to protect the skin from damage caused by free radicals.

Here is a more detailed explanation of how Acetyl Decapeptide-3 works:

Collagen and elastin production: Acetyl Decapeptide-3 works by binding to specific receptors on the skin cells. This binding activates a signaling pathway that leads to the increased production of collagen and elastin. Collagen and elastin are two proteins that give the skin its structure and elasticity. As we age, our bodies produce less collagen and elastin, which is why our skin starts to wrinkle and sag. Acetyl Decapeptide-3 can help to reverse this process by stimulating the production of collagen and elastin.

Free radical protection: Free radicals are unstable molecules that can damage the skin cells. Acetyl Decapeptide-3 contains antioxidants that help to protect the skin from free radical damage. This is important because free radical damage can lead to premature aging, wrinkles, and other skin problems.

In clinical studies, Acetyl Decapeptide-3 has been shown to be effective in reducing the appearance of wrinkles, improving skin tone and texture, and increasing overall skin hydration. It is generally safe and well-tolerated, even for sensitive skin.

Overall, Acetyl Decapeptide-3 is a promising anti-aging ingredient that can help to improve the appearance of the skin. It is important to note that Acetyl Decapeptide-3 is not a miracle cure for wrinkles and aging. It is important to use it in conjunction with other skincare products and lifestyle changes, such as wearing sunscreen and eating a healthy diet.

Benefits of Acetyl Decapeptide-3 (Rejuline)

Reduces the appearance of wrinkles and fine lines

Improves skin tone and texture

Increases skin hydration

Protects the skin from free radical damage

Stimulates collagen and elastin production

Acetyl Decapeptide-3 can be found in a variety of skincare products, including serums, moisturizers, creams, and masks. It is typically used at a concentration of 0.1-1%.

Functions of Acetyl Decapeptide-3 (Rejuline)

Acetyl Decapeptide-3 can accelerate the formation of new skin cells, reducing and preventing fine lines, wrinkles, and scars. It also can strengthen skin elasticity by inducing the synthesis of collagen and elastin.

Recommended Use Level of Acetyl Decapeptide-3

The recommended use level of Acetyl Decapeptide-3 (Rejuline) in skincare products is 100-1000PPM. If you are unsure of the recommended use level of Acetyl Decapeptide-3 in a particular product, it is always best to consult with the manufacturer or a skincare professional.
