

500-1200D Terrestrial Dried Silkworm Pupa Cosmetic Peptide Yellowish Brown Powder

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: HPLC
- Model Number: HBY- Silkworm Pupa Peptide
- Minimum Order Quantity: 1kg/bag, 25kg/barrel
- Price: Negotiable
- Packaging Details: 1kg/bag, 25kg/barrel1
- Delivery Time: 3~5 days, upon receipt of payment
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 5000kg/month

Silkworm Pupa Peptide

Product Specification

- Product Name: Silkworm Pupa Peptide
- Color: White To Yellowish Brown
- Taste And Smell: With This Product Unique Taste And Smell, No Smell
- Impurity: No Visible Exogenous Impurity
- Bulk Density g/ml : 0.37
- Average Molecular Weight: <1000Dal
- Source: Walnut Meal
- Moisture % : 4.5
- PH 6.67% : 6.10
- Highlight: **Silkworm Pupa Peptide Powder ,
Silkworm Pupa Cosmetic Peptide**

Product Description

500-1200D Terrestrial Dried Silkworm Pupa Peptide Yellowish Brown Powder

Silkworm Pupa Peptide is a protein extracted from silkworm pupae. Silkworms are silk-producing insects, and the pupa is the stage in the silkworm's life cycle between the larva and the adult moth. Silkworm pupae are a rich source of protein and have been used in traditional Chinese medicine for centuries.

Peptides are extracted from silkworm pupae through a process called enzymatic hydrolysis. This process involves using enzymes to break down the proteins in silkworm pupae into smaller peptides. Pupa Peptide is a white or yellow powder that is soluble in water.

Product Name	500-1200D Silkworm Pupa Peptide
Color	White To Yellowish Brown Powder
Average Molecular Weight	<1000Dal
Bulk Density(g/ml)	0.37
Source	Walnut Meal

Silkworm pupa peptide has been shown to have several health benefits, including:

- Anti-inflammatory properties
- Antioxidant properties
- Antimicrobial properties
- Immunomodulatory properties
- Neuroprotective properties
- Anti-cancer properties

Silkworm pupa peptide is available in various forms, including powder, capsules, and tablets. It is also available as a topical cream. Silkworm pupa peptide is generally considered safe, but it is important to speak to your doctor before taking it, especially if you are pregnant or breastfeeding.

Here are some of the potential health benefits of silkworm pupa peptide:

Anti-inflammatory: Silkworm pupa peptide has been shown to reduce inflammation in the body. This may help to protect against chronic diseases such as heart disease, cancer, and arthritis.

Antioxidant: Silkworm pupa peptide is a powerful antioxidant. Antioxidants help to protect the body from damage caused by free radicals. Free radicals are unstable molecules that can damage cells and DNA.

Antimicrobial: Silkworm pupa peptide has been shown to have antimicrobial activity against several bacteria and viruses. This may help to protect against infections.

Immunomodulatory: Silkworm pupa peptide has been shown to modulate the immune system. This means that it can help to boost the immune system and protect against infections.

Neuroprotective: Silkworm pupa peptide has been shown to protect the brain from damage. This may help to protect against neurodegenerative diseases such as Alzheimer's disease and Parkinson's disease.

Anti-cancer: Silkworm pupa peptide has been shown to have anti-cancer properties. This means that it may help to prevent cancer or slow its growth.

Silkworm pupa peptide is a promising new natural product with many potential health benefits. More research is needed to confirm these benefits, but silkworm pupa peptide has the potential to be a valuable addition to the treatment of some diseases.
